'GYNOSONE' A NEW SYNTHETIC OESTROGEN

'Gynosone' brand triphenylchloroethylene may be employed in all the conditions which normally respond to the administration of natural or synthetic oestrogenic hormones. It is particularly useful in the symptomatic treatment of the menopausal syndrome, in atrophic conditions of the vagina and for inhibiting lactation.

Given by the mouth, the duration of action of 'Gynosone' is similar to that of stilboestrol, but its administration is characterised by the almost complete absence of unpleasant side-effects such as nausea and vomiting.

'Gynosone' for oral administration is issued in tablets of 0.5 gramme in packings of 10, 100 and 500.

Further information will be supplied on request.

MEDICAL DEPT., BOOTS PURE DRUG CO. LTD NOTTINGHAM

BR 19-206

**Is a sterile
Sulphonamide
pack possible?**

YES, and here is the answer. Not only do 'STERUCID AMPOULES' contain 'Albucid' (sulphacetamide) or 'Albucid' Soluble (sodium sulphacetamide) as a finely divided, absolutely sterile powder, ready for immediate use; the ampoules themselves can easily be sterilised externally. In sulphonamide therapy where large surfaces or cavities have to be treated, 'Albucid' may be preferred to the more soluble 'Albucid' Soluble, since it minimises the risk of too rapid absorption of a large dose of the drug.

STERUCID AMPOULES containing 5 grams Sterile Albucid Powder.

STERUCID AMPOULES containing 5 grams Sterile Albucid Soluble Powder.

CALCIBRONAT

(Calcium bromo-lactobionate)

Calcibronat combines the sedative action of bromine on the subcortical and medullary centres of the brain with the calmative effect of calcium on hyper-excitability of the autonomic nervous system.

In Calcibronat the calcium bromine ratio is the optimum of 1:2 and this amount of calcium is sufficient to remove the danger of bromine intolerance in addition to providing the valuable calcium action. The sedative effect is approximately double that to be expected from the bromine content.

FOR THE BUSY PRACTITIONER

The convenience of tablet medication is undoubtedly of marked value in the treatment of many conditions presented daily to the physician.

This is particularly true of alkaline therapy, where 'Milk of Magnesia' Tablets are a frequent and everyday prescription. In the busy dispensary, or for providing immediate symptomatic relief while visiting the patient's home, they present advantages readily appreciated by the practitioner.

Quickly dispensed, accurate in dosage and convenient to take during working hours, 'Milk of Magnesia' Tablets offer a simple yet efficacious means of combating gastric upset due to hyperchlorhydria.

SPECIAL PROFESSIONAL PACKS

For personal, surgery or dispensing use, a professional pack of 'Milk of Magnesia' Tablets is available. This contains 500 Tablets and costs 8/9, (including tax) post free. Orders should be sent direct.

The Natural Aid to NUTRITION

WHEN the general nutrition of the body is below normal as a result of dietary errors or of debilitating diseases, the use of 'Ovaltine' is of greater and more lasting value than that of chemical stimulants. It adequately reinforces and renders safe the ordinary dietary; is a powerful source of energy and assists tissue regeneration.

A considerable measure of the value of 'Ovaltine' as a highly satisfactory accessory food and aid to nutrition is due to its constituents—milk, eggs and malt extract. 'Ovaltine' is not only highly nutritious but really delightful to the taste, and particularly easy of digestion.

Total Liver Extract for Parenteral Injection

Hepolon is produced by improved processes which conserve all the known hæmatopoietic principles of the whole liver; it gives no reactions for histamine or undesirable protein. Hepolon approximates to the extract described by Gänsslen; later extracts have been described as of narrower therapeutic value. Hepolon not only passes the highest clinical tests for potency against pernicious anæmia but contains Whipple's factor, Wills's factor, riboflavine, nicotinic acid, and the hæmatinic minerals of liver.

Ampoules of 2 c.cm.: box of 6, 6/-, box of 12, 11/6, and box of 24, 22/-.
Rubber-capped vial of 10 c.cm., 5/-, and of 30 c.cm., 12/6.

HEPOLON

Contains in 100 c.cm. the total soluble extractive matter of 250 g. fresh liver

For Your Information

Representatives to call more often

Now that all our representatives are back from the Forces, we are able to arrange for calls to be more frequent than of recent years. You will receive a call approximately every four months, when orders will be collected on the basis of the quotas allocated under our Retail Distribution Scheme.

Our standing with the public

Throughout the War years and the present difficult period, the high quality of our products has been fully maintained. For example, with regard to Optrex we have kept resolutely to our belief that "only the best is good enough for the eyes" even though this has meant, of course, severely limiting supplies. Our standing with the public remains, therefore, as high as ever.

Prescription Scheme withdrawn

The special Prescription Scheme we introduced early in the War to ensure that our products would, so far as possible, always be available in the most urgent cases, has now been withdrawn—although naturally our products will still be available against medical scripts. We should like to take this opportunity of thanking you for co-operating with us in running the Scheme and so helping those members of the public whose needs were greatest.

Advance Information

Optrex Eye Compresses will shortly be available. Full particulars from our representative when he calls.

The Caplan ELECTROCONVULSANT Apparatus

An Improved Lightweight Instrument for the Psychiatrist

The advantages of this new apparatus are that it is simple and quick to operate, it is absolutely safe both for patient and doctor, and it is light in weight and handy in size. It is robust so that it stands up to the strain of routine practical use, and it has been designed in such a way that the risks of technical breakdown have been reduced to a negligible minimum.

Its improved design is based on the rejection of the idea that the convulsant dose can be calculated in advance by measuring the resistance of the patient. Circuits for the measurement of this resistance have therefore been eliminated, thus simplifying not only the construction but also the working of the apparatus (Gerald Caplan, J.Ment.Sci., 1945, 91,200).

A new type of electronic time switch is

incorporated, which gives an entirely safe and reliable performance under all conditions.

An arrangement of push button switches prevents accidents to the patient or the nursing staff while the electrodes are being adjusted, and at the same time reduces the actual procedure of administering the shock to its simplest terms. For this reason, and also because the apparatus is so small and easy to handle, the treatment time is greatly reduced.

Standard Model. 200/250 volts, 50 cycles A.C. The output is 40-150 volts for 0.1-1.0 second. It is housed in a strong metal cabinet measuring 9 in. x 9 in. x 8 in., and weighs 16 lbs.

Price. 40 guineas. One year's guarantee.

Models are available for immediate delivery on 14 days' trial.

INCREASED PREVALENCE OF HYPERACIDITY

The influence of war-time conditions is responsible for the marked increase in the number of patients presenting symptoms of gastric upset.

Generally the sufferer gives a history of hurried meals at irregular hours, with a stress factor arising from long hours of work and restricted relaxation.

'Milk of Magnesia' is invaluable in securing rapid control of discomfort and distress.

Composed of a colloidal suspension of magnesium hydroxide, it soothes the inflamed mucosa, neutralizes the excess acid without liberation of gas, and its mild laxative action ensures removal of toxic waste products.

'Milk of Magnesia' may confidently be prescribed in the mild case of dyspepsia or the acute ulcer stage where sustained alkaline treatment is essential.

'MILK OF MAGNESIA' —

(Regd.)

THE CHAS. H. PHILLIPS CHEMICAL CO. LTD., 1, WARPLE WAY, LONDON, W.3

'Milk of Magnesia' is the trade mark of Phillips' preparation of magnesia.

STREPH

* THE COMPLETE ANTISEPTIC

THE ADVANTAGES OF STREPH may be summarised as follows:

- 1 Non-selective.
- 2 Activity is maintained in the presence of proteins.
- 3 Non-necrotic, non-toxic, non-staining.
- 4 Clear solutions with water, normal saline, and alcohol.
- 5 Powerful deodorant.
- 6 Almost odourless.
- 7 Powerful detergent and compatible with soap.

STREPH is approximately three times as effective as Liq. Chloroxylonol or Iysol. For these reasons STREPH is the ideal antiseptic for medical, surgical and obstetrical use.

BACTERICIDAL DILUTIONS OF STREPH* AT 37°C. WITH AND WITHOUT SERUM

TWO PAINFUL POINTS

One in front and one at a corresponding height in the lumbar region—these are the two painful points that help to distinguish gall bladder involvement from appendicitis and certain other abdominal diseases. Unless the condition is at an acute stage, medical treatment with Veracolate, by stimulating the flow of bile and clearing out the intestinal tract, may assist in establishing the true diagnosis. By supplying the combined bile salts, sodium taurocholate and sodium glycocholate, Veracolate favours the solution of cholesterol present in bile, the thickening and precipitation of which may obstruct the flow of bile and eventually lead to stone formation.
